Recently, I heard Paul Tsongas mention Colin Powell as a possible third party Presidential candidate. Powell, as you'll recall, played a prominent role in that most famous of "New World Order" wars, the Persian Gulf War.

If Powell is nominated by this party, I propose that it be named the "Military-Industrial Party", in honor of its sponsors, and in honor of Dwight David Eisenhower, the general who gave them their famous moniker.

The virtue of this party is that it will take us to our destination faster than the Democrats and Republicans can take us. A third party for the taxpayers? A party which nominates candidates electronically, candidates who contract with the people to carry out their political wishes? Too dangerous. The people can't be trusted.

Government should be left to these patriotic men. To honor these defenders of our everything this country stands for, I propose the following campaign slogans. They are free to use them however they see fit.
